Calendar Views

MyMealOrder.com provides two calendar views to choose from when ordering meals for your students.

- **Week View** – displays meals that are scheduled for each student on the account in a five-day (Mon-Fri) view. This allows you to see all students in the selected week, in one screen.
- **Month View** – displays meals that are scheduled for each student on the account in a calendar month view. This view allows you to see a month calendar view for all meals that are scheduled for the selected month. Only one student’s scheduled meals are shown at a time. You can use the Student View Settings dropdown in the upper left portion of the screen, to switch between students.

Also available in the Student View Settings dropdown is the ability to switch between:

- **Students With Orders** – shows all students who have an order placed for each day of the month
- **Students Missing Orders** – shows students for each day where there is no order placed. This allows you to quickly ensure that all days have an order placed.

Orders can be placed in either view.
